

<ŁUKASZ ADAMCZAK>

I'm a software engineer and a full-stack developer with a broad interest in web, mobile, and desktop applications. I have 15+ years of professional web development and Ruby programming experience. In my career I have shipped numerous client projects, from your run-of-the-mill Rails eCommerce sites to custom modules for large-scale projects. I am interested and get involved in all stages of product development - from UI design through prototyping and development all the way to deployment. I value clear communication, clean code, finding the simplest solution, and getting things done.

PROFESSIONAL EXPERIENCE

Getaround.com

Senior Backend Engineer

11/2021 - 03/2025

Remote

Initially in the Getaround Sustainability team, I worked to improve user experience for EV users on the platform. Transitioning to the Finance/Trust team, I developed and maintained key financial flows and robust vetting procedures for our users.

- Led integration of third-party platform to automate US sales tax calculations and compliance
- Designed and launched initial toll charging and compensation system on the platform
- Improved EV owner experience with charging education screens and implementing recharging fees
- Participated in onboarding new team members & mentoring a junior developer

Nabobil.no

Full-Stack Ruby on Rails Developer

09/2016 - 11/2021

Remote

As member of the engineering team at Nabobil, I worked on the entire stack, developing features for the web and mobile apps of the carsharing platform. I was involved in building and maintaining the user-facing product and the admin tools from the ground up.

- Developed full-stack features for Nabobil's web platform using Ruby on Rails, PostgreSQL and React
- Built and maintained user-facing product and admin tools
- Created and enhanced mobile API and app functionality with React Native, using GraphQL for efficient data management

Senior Ruby Developer

10/2011 - 09/2015

Hybrid

I worked on multiple client projects either as external consultant, an additional member to client's in-house team, or a sole developer in the prototyping phase of a project.

- Led the transition from SQL-based search to Elasticsearch for a large ecommerce site
- Implemented a pure-Ruby transactional mailing system with a Thrift interface for a major classifieds portal
- Integrated YouTube Javascript API for a large conference website
- Worked closely with the client as a sole developer during a 6-month MVP phase - from initial Bootstrap prototype through a number of iterations

Ruby & iOS Developer

10/2009 - 09/2011

On-site

I was part of the team building a local search-and-discovery platform - Lokter. Also contributed to several other in-house and client projects.

- Developed core backend features for a local search-and-discovery platform in Ruby/Rails
- Worked on the Lokter iOS client 1.0 in Objective-C
- Implemented a complete Ruby/Rails/MongoDB backend for a voting/feedback system based on client designs and specs

Ruby Rails Objective-C JavaScript jQuery MySQL

Various clients

Freelance Full-Stack Developer

05/2008 - 10/2009

Remote

When I discovered Ruby on Rails I felt ready to take on the world. I worked on several small to medium projects primarily as a sole Ruby developer working closely with the client and a designer/frontend engineer.

- Built a complete auction site backend based on client designs with Ruby on Rails
- Integrated PDF form generation into a Rails web app via iText & JRuby
- Developed a backend for a large client site with BrowserCMS

Ruby Rails RSpec MySQL CSS HTML jQuery JavaScript

Edu Labs

PHP Developer

02/2008 - 05/2008

On-site

After gravitating more towards web development, I joined a small interactive agency. However, after a few months of PHP I knew there had to be a better way.

- Co-developed the in-house CMS using Zend Framework and object-oriented PHP
- Worked on the front- and backend for a few client websites

JavaScript CSS HTML PHP Zend Framework

PTK Centertel

Java/Web Developer

11/2006 - 04/2007

On-site

My first programming job out of university. I worked part-time at a large telecommunications company.

- Implemented a number of features for an in-house Struts + Javascript application

Java Apache Struts Jakarta Server Pages JavaScript jQuery
